

1 **IN THE CLAIMS:**

2 *Sub 1* 1. (Once Amended) A communications enhancement means for providing information
3 regarding a related subject matter from an alternate source, comprising:

4 a client communicating with at least a server;
5 at least a first source and a second source located on said server;
6 a communication means between said first source and said second source; and
7 a display component allowing the transfer of information between said first source and
8 said second source;

9 whereby the related subject matter from the alternate source is determined from the
10 interaction of the client with said first source and is autonomously provided thereto.

11

12 *Sub 4* 10. (Once Amended) [A] An Internet system for generating an additional order,
13 comprising:

14 at least a server;
15 at least a first source communicating with a second source through the use of said server;
16 at least a client conducting an interaction with said first source; and
17 a display component allowing the furnishing of information between said first source and
18 said second source that is comprehensible to said client, whereby the interaction of said client
19 with said first source determines the information furnished by said second source without
20 requiring a specific client request.

21

22 *Sub 13* 17. (Once Amended) The Internet system of Claim 10, wherein said first source [is a
23 web page] is a first web page at a first IP address and said second source has a second IP address.

1 18. (Once Amended) A method for ordering an item using a computer network, the
2 method comprising:
3 providing personal information of a user to a first source to finalize a purchase
4 transaction on said first source;
5 issuing a request to a second source for [the] an item that is related to a subject of the
6 purchase transaction;
7 displaying information identifying the item that is related to the subject of the purchase
8 transaction and displaying an assenting actuation means to purchase the item;
9 transferring personal information of said user from said first source to said second source
10 in a secure fashion upon assent of the user to purchase said item.
